

Do your children use the Internet at home?

Can you be there every time they are online?

We're here to help.

How It Works – Fingerprint Login

- After registration on DolphinSecure.com, a parent is able to download Dolphin Secure software onto any computer in the home. From then on, every time a child tries to access the Internet, a log-in page is triggered. Children simply enter their username and scan their fingerprint on the reader (purchased at registration). They are brought to their homepage on Dolphin Surf, Dolphin Secure's social network.
- Parents can...
 - **Guide where they go:** Dolphin Secure has a "master white list" of pre-determined, age-appropriate websites for children to visit. Children **can only visit sites** on their specific "white list", which can be customized by their parent.
 - **Decide who they can talk to:** Parents can **set the boundaries** of who their child can talk to online, through a wide variety of options, from a range of ages and genders, to specific people, or no one at all.
- OFA can also have its' own online group within Dolphin where they **can share information, photos, and videos and chat with other children** in a secure, closed environment.

FREE Trial Offer while raising money for Oak Forest!!!

- With the help from Dolphin Digital Media and United Way, we are proudly extending a special FREE TRIAL offer to OFA students only!
